

Swiss made Soil moisture measuring system

PlantCare Mini-Logger
maintenance-free sensor for recording
soil moisture and soil temperature

PlantCare DataViewer
software voor quick and easy display and
analysis of data

- Relative soil moisture in % and hPa
- Speedily reaction to changes in moisture levels
- Reliable results even at minimum depths (from 5 cm).
- Unaffected by salt or fertilizer content
- Precise recording of measurements through built-in quartz clock
- Programming and reading out by USB-interface
- Maintenance-free
- Weatherproof IP67 housing
